Sow Wheat and Rie, remove young plants & trees about the new moon, observing this as a seasonable secret, that in seting you carefully place that side to the South and West, which were so before you took up the Plant, otherwise the cold kils it: gather your remaining Winter fruit, set all kinds of Nuts & Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The garments you last moneth hung on your backs in jest, now buton them close in good earnest; cloath you now for prevention, for the cold comes insensibly, and fogs oft times beget a whole winters cold. Consult with your Tailors as well as Physicians.
